Software Projects

Help Desk Web Application https://devdeskque.netlify.com

- Built back-end API using Python
- CSS responsive design

News Reader Web Application https://github.com/djzaragoza/Sprint-Challenge-Lambda-Times-React

- Created menu and news article widgets using Javascript and React
- Implemented carousel animation effect using CSS with a preprocessor

Music Player Web Application https://groovn-frontend-prod.netlify.com/
(front end deployment)

- Implemented authentication using Oauth and Passport.js strategies
- Used React Context, which gave us the ability to pass data through a component with ease
- Back End - built using Node.js, Express, MongoDB (database), Mongoose (query building and schema) and Apollo GraphQL
- Front End - built using React and React Hooks library, mainly to utilize the concept of neglecting the use of writing a class was time-saving
- Used Spotify API to enable and utilize music player
- Conducted numerous testing on user authentication, routes, database, created queries, playlist creation, recommendation engine, playlists and component functionality

Languages and Technologies

- HTML, CSS, SaSS, JavaScript, Material UI, Passport.js, React, Redux
- Node.js, Express, Python, MySQL, PostgreSQL, MongoDB, REST API, Apollo GraphQL

Education

Lambda School   **2019 - Present**

- **Certification of Endorsement - Full Stack Software Developer**
  Remote Bootcamp Program (Web Development) 1500+ hours of coding experience
    - Combination of guided projects, sprint challenges, buildweeks, labs and career readiness
    - *Graduation date: May 2020*

Warner Pacific University   **2007 - 2009**

- **B.S. in Business Administration**
  Minor in Organizational Leadership

Employment

Staff Accountant   **UPM Technology, Inc**   **2014 - 2018**
Hillsboro, Oregon

- Responsible for creating/maintaining AP/AR corporate financial reports via Excel
- Built/maintained AP/AR cash flow spreadsheet via Excel
